

FM GROUP World

WE CARE ABOUT ANIMALS

FM GROUP World, in line with corporate social responsibility, is categorically against animal testing and inhumane treatment of animals.

FM GROUP World finished products are not and never were tested on animals. We do not conduct or commission animal testing to other companies. Few zoonotic ingredients in FM GROUP World products are used because of their superior quality and valuable properties difficult to substitute in any other way (e.g. honey nectar in honey lip gel). However, sourcing of these ingredients does not cause death or injury to animals, it is conducted in safe and natural way.

We do not use products derived from slaughter of animals. Make-up brush natural bristles are obtained from animals, however, they were not subjected to any kind of suffering or discomfort.

Having in mind improvement of your animal life quality, especially pets, we introduced FM GROUP PETS series. It consists of various excellent shampoos for dogs and cats. These products will ensure proper hair and fur care of your four-legged friends.
